

Cloud Services and Solutions

OVERVIEW:

Our roots started on-premise and our branches continue to **Shoot For The Cloud!**

iArch Solutions has taken the next step in our evolution and is happy to announce the same **trusted and proven experience** in technical excellence is available for all of your Cloud Technical Infrastructure, Application Design, Functionality, and Data Integration needs!

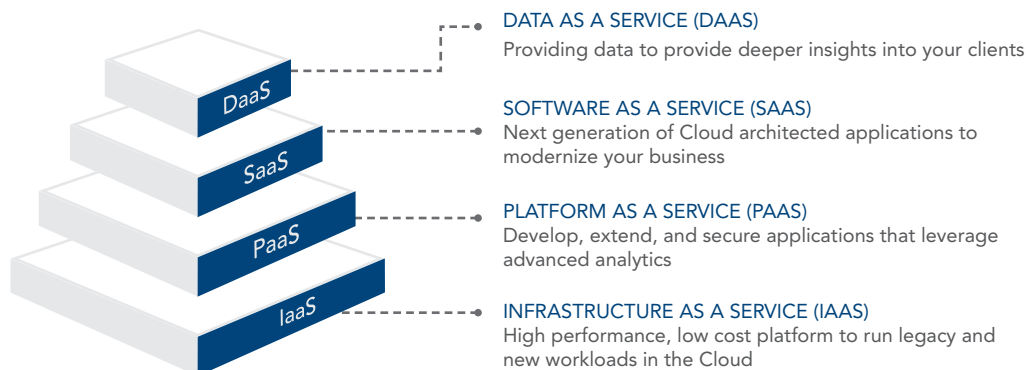

Cloud Integration and Migration projects may seem daunting at times. We know that nobody understands **your business** like you do. Some firms come in and want to take over, do things "their way" and cut corners in delivery to meet unrealistically agreed to deadlines. Often times, the Admin and PM aspects of a project run away and the scope of an engagement starts to spiral.

At iArch Solutions we believe in an honest, open and upfront collaborative work model. By adhering to our in-house "P.I.E.C.E." implementation methodology, our engineers and deployment teams will be working jointly and have daily interaction with your key business and technical staff. This ensures that every project we deliver comes in above expectations, within budget and normally in a faster than promised timeline.

SERVICES:

We offer Full Cloud Technical Infrastructure Services including:

- » Cloud Implementation and Migration Services
- » Public and Private Cloud
- » Cloud Assessments, Architecture, Strategy and Roadmap Design
- » Cloud Managed Services and Support Packages
- » On-Premise to Cloud Hybrid Integration Services
- » Full Cloud Disaster and Recovery Solutions
- » Certified and Specialized Staffing
- » Oracle Cloud Infrastructure (OCI)
- » Amazon Web Services (AWS)

Full technical and functional consulting services available to help you **design, deploy and support** your current and future Cloud Strategy

WHAT EXACTLY IS THE "ORACLE CLOUD"?

The Oracle Cloud is a comprehensive and state of the art "best in breed" suite of Cloud Computing Services including: Infrastructure as a Service (IaaS), Platform as a Service (PaaS), Software as a Service (SaaS), and Database as a Service (DaaS) Cloud systems and applications. Leveraging anyone of or a combination of these products and services, Oracle customers can build, deploy, integrate and extend their own applications in the Cloud.

Being a Certified and Specialized Gold Partner of Oracle means we have access to the cutting edge of information and technology for all of Oracle's Cloud Applications, and Infrastructure Services technologies and programs.

Got IaaS on the mind?

Our tenured and sought-after experts have over 20 years combined in "Cloud Infrastructure" experience. Let us help you architect and implement the most secure, reliable and best performing Infrastructure as a Service (IaaS) solution for all of your Enterprise software needs.

Looking for the next generation of Cloud Applications?

iArch Solutions can also help design, deploy and support all of your Software as a Service (SaaS) projects through our extensive Application Consulting Services division.

Oracle has a multitude of SaaS product offerings in their growing library of "Oracle Cloud Applications. iArch Solutions staff have worked on numerous projects across the entire Cloud Application line including the Oracle Enterprise Performance Management (EPM/Hyperion) and Business Intelligence (BI), Human Capital Management (HCM) and Customer Experience (CX) related toolsets.

iArch Solutions provides application consulting and support services on the following Oracle Hyperion Enterprise Performance Management (EPM) products:

- » Oracle Enterprise Data Management Cloud
- » Oracle Enterprise Planning Cloud
- » Oracle Planning and Budgeting Cloud
- » Oracle Enterprise Performance Reporting Cloud
- » Oracle Account Reconciliation Cloud
- » Oracle Financial Consolidation and Close Cloud
- » Oracle Profitability and Cost Management Cloud
- » Oracle Tax Reporting Cloud
- » Oracle Business Intelligence Cloud Service
- » Oracle Essbase Cloud
- » Oracle Data Integrator Cloud Service

Contact us today to discuss how we can help your organization "Shoot For The Cloud" with minimal to no downtime for your critical Financial and Analytic Applications.
